# SEMINARIO SANMOMA-GRADUADOS

Centro de Investigación en Ingeniería Matemática, CI<sup>2</sup>MA, UDEC

---

*Expositor:*

DANIEL INZUNZA\*

*Título de la charla:*

HIGH ORDER FINITE DIFFERENCE WENO  
SCHEME MODELLING CROWD MOVEMENTS

*Lugar:*

HALL DEL CI<sup>2</sup>MA

*Fecha:*

MIÉRCOLES 16 DE OCTUBRE. 15:30 HORAS<sup>†</sup>

## Resumen

We present a high order version of the numerical scheme proposed in [1, 2] for a class of conservation laws with non-local flux modelling crowd dynamics. The resulting dynamics captures various well-known patterns of crowd movements, such as the clogging of exits and the spontaneous formation of queues. Particular care is given to how non-local interactions are influenced by walls, obstacles and exits.
